

Ordering The Right LTO Barcode Labels

Qualstar offers two types of LTO barcode labels: labels with a Check Digit Verification (CDV) character and labels without CDV. Non-CDV labels are commonly referred to as “IBM” or “industry” format labels.

All labels sold by Qualstar prior to March 1, 2007 include a CDV character to enhance the accuracy of barcode reading. Customers who are already using IBM/industry labels should continue that format. We only stock labels in the sets described below.

Please read [PIN-040](#) for important information about selecting the right labels for your library. Mixing tapes with CDV and non-CDV labels in the same library is not supported.

Stock Label Sets with CDV (not XLS)

Part Number	Media Type	Sequence	Price
734-0022-8	LTO 3 with CDV	A00000-A00299	\$150
734-0034-3	LTO 4 with CDV	A00000-A00299	\$150
734-0036-8	LTO 5 with CDV	A00000-A00299	\$150

Stock Label Sets Without CDV

Part Number	Media Type	Sequence	Price
734-0037-6	LTO 4 - No CDV	A00000-A00499	\$250
794-0038-4	LTO 5 - No CDV	A00000-A00499	\$250

Custom Sequence Label Sets

We now offer custom sequence labels in both CDV and non-CDV formats. Please be sure you are ordering the correct type, sequence and quantity of labels before placing the order. Use the [Custom LTO Barcode Label Form](#) to order either type in any sequence. All custom labels are non-returnable unless the order was manufactured in error.

- Minimum order is 500 contiguous labels
- Your cost is \$.50 per label
- Lead time is 7-10 business days
