

Q1™ OVERVIEW

The Qualstar Q1 is a standalone solution for transfer and archive of data. It can automatically transfer your data in the field to LTFS formatted LTO-6 or LTO-7 tapes for interchange with your main digital repository. This rugged system is designed to be used in the field to offload data from various sources or devices for consolidation and backup.

After initial set up the software supports automatic duplication and verification of data from your selected sources, data may be sent to the Q1 over the network or from devices connected directly to it via USB or eSATA. The media reader supports copying data from various forms of memory cards.

The Q1 is a unique, innovative and cost effective solution for professionals who want to Archive, Transport Files or Restore using the LTFS file format.

With recording, backup and asset management options, the Q1 is as simple as drag and drop.
